### **Cautionary Note Regarding Non-GAAP Measures**

This website and the documents incorporated by reference herein include certain terms or performance measures commonly used in the mining industry that are not defined under United States generally accepted accounting principles (“GAAP”), including adjusted attributable net income, adjusted basic attributable net income per share, free cash flow, net cash, cash costs and all-in sustaining costs (“AISC”) per ounce sold. The non-GAAP financial measures are employed by us to measure our operating and economic performance and to assist in decision-making, as well as to provide key performance information to senior management. We believe that, in addition to conventional measures prepared in accordance with GAAP, certain investors use this information to evaluate our operating and financial performance; however, these non-GAAP performance measures do not have any standardized meaning. These performance measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Our definitions of our non-GAAP financial measures may not be comparable to similarly titled measures reported by other companies. These non-GAAP measures should be read in conjunction with our consolidated financial statements filed with the SEC (which may be viewed at [www.sec.gov](http://www.sec.gov)) and the Canadian provincial securities regulatory authorities (which may be viewed at [www.sedarplus.ca](http://www.sedarplus.ca)) for a more detailed discussion of how we calculate such measures.
